EUTECH’s Projects – Visions for Europe Magazine, White Paper & Position Paper, Social Media Marketing, Fish – X Project co-funded by the European Union

SO, JOIN US
Choices for joining as many as 16 Alliances that offer multiple options for your engagement.
The European Technology Chamber (EUTECH) is a registered not-for-profit organization on a mission to enable European businesses to use technology for the benefit of Europe and humanity, guided by our vision, Technology Obliges.

EUTECH is committed to bringing people and organizations together who share a vision for building our collective future: leveraging technology to enable solutions for some of our most fundamental issues, fostering social responsibility to empower citizens, and protecting our environment to provide sustainable ecosystems.

Our mission is to act as the voice of the European technology industry and help tech companies to become more competitive, sustainable and grow in Europe and worldwide so as to create awareness and dialogue among technology leaders to develop advanced solutions for the challenges faced in achieving the UN’s Sustainable Development Goals (SDGs).
SHARING OUR GOALS & VALUES

EUTECH is committed to a sustainable future and to improving the social, economic, and environmental well-being of the mankind through technology. Our vision is to enable European companies to become more competitive and enable them with access to finance and resources that will allow them to achieve their growth objectives as well as contribute to the UN’s Sustainable Development Goals Agenda.

- **Growth**: Helping companies worldwide accomplish their growth potential.
- **Sustainability**: Reaching the UN’s Sustainable Development Goals.
- **Competitiveness**: Strengthen and promote European technologies & values.
OUR MISSION
We all know that we face big challenges in today’s world: poverty, hunger, inequality and climate change are just some of the issues we need to address urgently. Big challenges need bold action to overcome them, and there has never been a better time than now to turn these challenges into opportunities and find new avenues for sustainable growth with the rapid shifts in technologies which are changing the context for pursuing Sustainable Development Goals (SDGs).

We believe, the technology for transformation redefines human life and makes the impossible possible. Small technologies can solve big problems. From famine to poverty, water scarcity to business management, or healthcare to education, it has all the answers.

EUTECH’s mission is to support technology best practices to make massive improvements in access to achieving the UN’s Sustainable Development Goals by 2030, in collaboration with our Advocates, Supporters, and Partners.
OUR STRUCTURE
EUTECH bodies support groups of experienced professionals who provide guidance for operational direction and global business strategies. These bodies establish the framework for operations and support EUTECH in achieving its objectives of promoting sustainable development on a global scale.
EUTECH Alliances are groups specially formed to gather companies under the able leadership of Directors and Coordinators. The purpose is to enable European companies to use technology on behalf of present and future generations to foster an inclusive, multi-faceted and value-driven society. Alliances are further separated into International, Impact and Tech, to allow Advocates to engage with specific enterprises according to their requirements.

The Alliance Board gathers once a month to discuss strategies, and policies and monitor implementation and activities. Competent Directors and Coordinators look after the daily activities of each Alliance under the guidance of Alliance Board.

International Alliances include APAC Alliance, Africa Alliance, Americas Alliance, BENELUX Alliance and DACH Alliance.

TECH Alliances include Digital Transformation Alliance, Energy Alliance, Environment Alliance, Food Farming Fisheries Alliance, Internet of Things (IoT) Alliance, Mobility Alliance, Smart Cities Alliance and Sustainable Manufacturing Alliance.

Impact Alliances include Climate Action Alliance, Finance Alliance, Sustainable Development Goals (SDG) Alliance and Women in Tech (WiT) Alliance.

Each Alliance has been meticulously organized to provide networking and business opportunities for Advocates and participants, considering the latest trends and developments globally, to increase prospective growth for all involved.
BECOMING AN EUTECH ADVOCATE

Our Advocates Network connects 50,000 Executives and Practitioners worldwide, bringing technology forces together on a single platform to share information, expertise, and ideas. Sharing professional knowledge and learning from the best minds maximizes everyone’s potential interests.

WHO ARE ADVOCATES?

Our Advocates are leaders in the field of technology who support our vision and mission of encouraging sustainable development. They participate in our events, initiatives, and programs and contribute to our publications to create meaningful change towards sustainable development and responsible technology.
WHY BECOME AN EUTECH ADVOCATE?

We enable our Advocates to become more competitive, which will allow them to achieve their growth objectives. Our Advocates can benefit from unlimited networking opportunities through an ‘Advocate and Stakeholder’ database specially designed to connect companies on a global platform in their respective sectors. EUTECH Advocates can also receive grant opportunities if their activities are practically contributing towards the achievement of the UN’s SDGs.

ENJOY ACCESS TO OUR EUTECH TECH.FORUM PLATFORM

Tech.Forum is EUTECH’s Multifunctional Networking Platform

- +50,000 Companies Database
- Precise Online World Profile Matchmaking
- Organize Events all over EU
- Exclusive Networking Events: +400 Networking Meetings per year
- Topic Driven Events: +200 Webinars per year
- Training Certificate Program & Hosting setup
ENJOY ACCESS TO OUR EUTECH PROGRAMS

As a EUTECH Advocate, you can be guaranteed access to an International Networking Hub of companies, interact with CEOs/COOs and entrepreneurs, brimming with innovative ideas and concepts to further growth and business opportunities. We truly realize the growth potential of our Advocates and offer them a comprehensive set of services.

Subsidies
We enable our Advocates and Supporters to become more competitive and empower them with access to subsidy solutions and resources that will allow them to achieve their growth objectives. Subsidies provide them the much-needed support to expand operations within a budget, reducing costs which would normally hamper their endeavors.

Our Grants
We offer our Advocates and Supporters grant opportunities provided their activities are practically contributing towards the achievement of the UN’s Sustainable Development Goals (SDG). This program is beneficial to startups and SMEs who show potential for taking their operations to the next level.
Get Featured in Tech Flash Video
Our Advocates can get free marketing videos created by the EUTECH production team. These promotional and informative videos, made by an expert global marketing team, will enable Advocate companies to increase their engagement and visibility, improving their ability to attract a wider audience.

Create a Virtual Company Booth
Our Advocates get access and credentials to their virtual booths on the EU Virtual Tech Centre to hold Meetings, Events, Exhibitions and more. This enables separate meetings with likeminded companies and Advocates to further discuss opportunities and solutions.

Climate Action Certification
Our Advocates can apply to get an official certificate that will accredit them as a climate-friendly organization committed to working towards sustainable development through the advancement of climate-friendly technology.
Organize Virtual & Hybrid Events
Our Advocates can organize unique Events, Conferences and Seminars or connect their in-person event to a Virtual Event, making it a Hybrid Event. This feature allows Advocate companies to broaden their network, quipped with a huge speaker database, and marketing companies can achieve instant results.

Organize a Virtual Trade Fair
Our Advocates can organize matchmaking and networking fairs and events at the EU Virtual Tech Centre. This special feature facilitates specific requirements of Advocate companies to connect with compatible groups and individuals for a certain cause, benefit, or solution.
ENJOY ACCESS TO OUR EUTECH PROJECTS

Be an Author of the Visions for Europe Magazine
Our Advocates have the chance to publish articles in EUTECH’s quarterly magazine, Visions for Europe, delivered to its entire database and available online to an unlimited audience. They can share their insights and ideas on vital topics in this carbon-neutral magazine.

Contribute to the Alliance White Papers or Position Papers
Our Advocates can contribute to EUTECH’s White Papers or Position Papers. White Papers are mainly targeted at the business world, which receives recommendations on how to best benefit from new technology and market trends, while Position Papers are targeted at the EU in order to give advice for action to facilitate the framework and infrastructure conditions as an enabler for expansion.

EUTECH Social Media Marketing
Our Advocates are provided with opportunities to promote in EUTECH all social media channels. New Advocates Announcement, Tech Flash videos made for our Advocates, Quote of the Day invites, Advocates News and many other social media initiatives are created to promote our Advocates in EUTECH channels.
About Fish-X Project

The Fish-X Project is a technology and open-source project which aims to make European Union Fishery Industry sustainable. It is a 3-year project that has been initiated and funded by the EU Horizon Europe Programme.

The massive digital transition in the EU creates an opportunity to reconcile environmental and socio-economic issues in the fisheries and seafood sector. It offers solutions to better manage fisheries’ activities and increase transparency and traceability, and it also plays a key role in the transition towards a truly sustainable Blue Economy. However, the digital transition in the fisheries sector also comes with significant challenges for some actors, especially Small-Scale Fisheries (SSF). SSF is a specific sector of the fisheries industry, usually disparate or remote, and it is community-based and uses small boats.
The Fish-X Project is an answer to these challenges as it is developing a Fisheries’ Dataspace (Fish-X), a Traceability App, and an Insight Platform that is based on smart orchestrated architecture and open interoperable technology via Gaia-X. The dataspace and platform allow users to utilise the data for improved fishing methods, increased yields, and protected endangered fish species. Moreover, the project also targets streamlining the Monitoring, Control, and Surveillance (MCS) Processes to support the implementation of Common Fisheries Policies (CFP). The project also brings together different stakeholders such as large to small-scale fisheries, fishermen associations, regulators, relevant ministries, and decision-makers, to participate in the consultative process of developing and refining new technologies in view of the changes and revisions to the CFP.

The project is being implemented by seven European organisations, called Consortium Partners, including TransMarTech Schleswig-Holstein (TMT, Germany), EU Tech Chamber (EUTECH, Germany), Collecte Localisation Satellites (CLS, France), North.io (Germany), Sciaena (Portugal), OURZ (Germany), and WWF EPO (Belgium).
**SO, JOIN US!**

Join us as an Advocate of the EU Tech Chamber (EUTECH) and become a member of as many of our 16 Alliances as you wish and enjoy the full spectrum of benefits.

Four choices are provided based on your company size.
